production

DESCRIPTION

Convert the prototype from the previous assignment into web-ready formats. Once the website is complete, present it to the client and document the client's response.

DELIVERABLE 1

All necessary HTML files, CSS files, JavaScript files, image files, video files, audio files, and font files published to a website on GitHub (see below for instructions) or another public website.

DELIVERABLE 2

A prepared 15-minute presentation walking us through your website and documenting your process from beginning to end. What did you learn? What was challenging? If you could do the website over again, how would you approach it knowing what you know now? What is the next step of this website?

OBJECTIVE

The purpose of this assignment is to learn to translate ideas from a fixed, static medium to a dynamic information environment. Students will also learn to solve the myriad visual and behavioral problems involved in moving between a pixel-based paradigm and a code-based paradigm. Finally, students will grasp how all of the various systems they've developed fully function and interact with each other.

DEADLINE

Both deliverables are due at the beginning of the last class on December 19. Please commit and upload your files to the master branch of your GitHub repository in a subfolder named "15 production." Additionally, please publish your website on GitHub at <http://username.github.io>. To do so, create a new GitHub repository named username.github.io where *username* is your GitHub username. Please share the URL with me by creating a file named "url" in the "15 production" folder. Finally, please commit and upload your presentation source file and a PDF to the master branch of your repository in a subfolder named "16 presentation."

When you create a new repository on GitHub, please add me as a collaborator. On GitHub.com, go to the repository's page and click **Settings > Collaborators** and enter my username, "saulbaizman."

Note: the homepage *must* be named index.html.

WEIGHT

This assignment carries a weight of 2.
